Name: Riyhana Ahmadi & Nasrin Haidari   ID No: 96315 & 96304

Project Name: Employee Register Form for Company

Introduction

Today all things work by technology and this caused which societies improve fast to be globalized. Already, humen tried to be inventor to create new way for create hundred percent technological world. But third world exist yet which do not use technology to suitable way. Afghanistan is one of them which recently to bring technology and some official aspects become to be digital. But already the most official base is in dark age. The Dark age is that time which people used paper done official and unofficial works.

To this caused, technicians must help this country could access to that knowledge which can use technology to aspects of life.

According upside reason, we decide to make a system for a company to register employees in Database technology to make fast their search function and datamining on long time. However, this system is so easy to use but it can be a way which our country to become computerized and protrude the Dark age to digital age.
